

RACE HEADQUARTERS

Real Time ChampionChip

- Virtually Weightless
- State of the Art Technology
- Tested and distributed worldwide
- Records official time (from gun) and net time (from start line)
- Faster result processing

About the ChampionChip:

The ChampionChip is an automatic race timing system in which computers at the start and finish read the personalized identification code of a transmitting “chip” worn by an athlete. The code is picked up by antennas housed under tartan carpets (which athletes cross at both the start and finish).

Advantages to you as an athlete:

- Individual start time is recorded reducing stress and crowding at the start
- Easy registration (owners will receive registration labels)
- Net and Split times
- Fast and accurate results
- Easy flowing finish line
- Can be used by all timed sports
- Chip can be used in other countries

Own the ChampionChip so you will be included in the world wide data base with a unique ID chip assigned only to you. Use your ChampionChip around the world or just around the block. Be a ChampionChip athlete for only **\$40.00** and bands for an additional **\$6.00 plus PST and GST**.
